Lucas Antunes

Studying at FIAP | RUST | TS | GO | JAVA | PYTHON | AWS |
DOCKER
São Paulo, São Paulo, Brazil

Summary

I'm studying information systems at FIAP, and I was a Full Stack
Developer Intern at Oak Tecnologia in the development area for
almost 2 years.

I aim to work as a Junior Full Stack Developer or Junior Backend
Developer, contributing effective solutions to digital products and
enhancing my technical and interpersonal skills in the workplace.

I have experience with Python, TypeScript, PHP, React, React
Native, and Docker.

I also have knowledge in Go, Rust, Java, SQL, and cloud
technologies such as AWS.

I have projects that I showcased at my university's technology fair
using Python and AWS, among many others. The code for my
projects is available on my GitHub.

Experience

Oak Tecnologia
Full Stack Engineer
September 2023 - August 2025 (2 years)
São José do Rio Preto, São Paulo, Brasil

Contributed to the development of an international (USA) project focused on
inspection and fire protection, using Next.js (Frontend), PHP (Backend), and
React Native (mobile app).
In a squad of 13 people (1 PO, 7 developers, and 5 analysts), I was
responsible for developing new pages and features, fixing bugs, and
refactoring parts of the project. In the final months, I also started performing
code reviews to ensure code quality.

Participated in the development of a project for an aesthetic clinic using React.js (Frontend) and Python Flask (Backend).
In a small squad of 3 people (1 PO, 1 developer, and 1 analyst), I developed new features by consuming data from a third-party API.

Collaborated on the development of a ticket purchasing system using Next.js (Frontend), PHP (Backend), and React Native (mobile app).
In a squad of 10 people (1 PO, 5 developers, and 3 analysts), I was responsible for bug fixing throughout the project.

Created RESTful endpoints and integrated with PostgreSQL.

Used Git, Docker, and agile methodologies (Kanban) in weekly sprint meetings.

Education

FIAP
Bachelor of Tecnology, Information Systems · (February 2022 - December 2025)

School Marista Arquidiocesano
Formação humana integral, Estudos Gerais · (February 2009 - December 2021)
