Avenida Itaborai 109, São Paulo, São Paulo, 02021030, Brazil

Aim to work as Full-Stack or Back-End Developer, contributing effective solutions to digital products and enhancing my technical and interpersonal skills.

Have experience with Python, TypeScript, PHP, React, React Native.

Also have knowledge in Go, Java, and cloud technologies such as AWS.

Work Experience

Full Stack Engineer
Oak Tecnologia | São José do Rio Preto, São Paulo, Brasil

Sep 2023 - Aug 2025

Worked in different projects from national to international ones.
Participated in both small and big squads ranging from 3 to 13 people.
Used several technologies like Python, PHP, React and Native on APIs.
I efficiently develop and implemented new features, delivering them on time.

Projects

Kraft Challenge
Mar 2023 - Dec 2023

Project for my university, about a problem brought by Kraft, and we were asked to program a solution for the problem.

Kernel simples em rust
Present

Desenvolvimento de um kernel simples em Rust funcional (possível digitar) com a utilização do virtualizador QEMU.

Plataforma de digitalização de rostos (Iniciação científica)
Present

Aplicação (Python) para digitalizar o rosto de pessoas com o uso de uma webcam, com o deploy feito na AWS e apresentado na feira de tecnologia da faculdade.
